

BCMI Will Feature AI Tools at WOC 2025

BCMI will be on hand at World of Concrete January 21-23, 2025, in Las Vegas, to showcase its software platform, and specifically tools with built-in artificial intelligence (AI). BCMI will feature its ProPilot AI for BCMI Dispatch, voice commands and queries for mobile apps, and a new AI Agent.

BCMI has listened to its customers and applied AI to its products in real ways that improve the lives of contractors, dispatchers, order takers, operations managers and executives. BCMI's ProPilot AI tools handle time-consuming research, calculations and repetitive tasks, freeing the experts to do skilled work in the field and dispatch offices.

ProPilot for Concrete Dispatch

- With BCMI's cloud-based concrete dispatch, contractors can submit order requests from a phone, tablet or desktop app.
- BCMI's AI-assisted order management tool interprets customer requests and prompts dispatchers to make changes on the fly.
- Approved changes are automatically applied to orders and confirmed to customers with a single click.
- Saves dispatchers and their customers time, reduces errors, tracks and stores changes for future reference.

ProPilot Voice Commands and Queries

- Automated tasks and built-in translation tools help non-English speakers navigate the Material Now app.
- Spoken queries generate data from dates, performance metrics and other parameters.

ProPilot AI Agent

- Ask the agent for any combination of records and statuses in the Material Pro app, whether it's there in a standard view or not.
- Pinpoints the information producers need most, helping navigate the day's challenges with ease.
- Get straight to the answers you need by asking a single question instead of searching through multiple screens.
- User access controls ensure the AI agent only provides authorized information to each app user.
- This tool monitors hundreds of thousands of producers' business-critical records in the BCMI Platform, communicates with API endpoints and synthesizes the information you need in an instant.
